

3rd & 4th July 2026.

## CLASSROOM ACTIVITY (2nd yr.)

The department of Eng. conducted a classroom activity on One-Word Substitution for 2nd yr. students. Each student was assigned to prepare five one-word substitutions in alphabetical order. During the session, students presented their words to the class, while their words classmates identified the correct answers and noted the new vocabulary in their notebooks. The primary objective of the activity was to enrich students' vocabulary, strengthen their command of English, and promote collaborative learning through active classroom participation. The activity also encouraged students who are usually hesitant to speak in class to come forward and participate with confidence. As learning five new words each day is practical and sustainable, the activity will continue on a regular basis to ensure gradual and consistent vocabulary development.
